

ARJUN SHARMA

Data Engineer | Python | SQL | AWS | Spark

Bengaluru, India • +91 98765 43210 • arjun.sharma@email.com
LinkedIn: linkedin.com/in/arjunsharma • GitHub: github.com/arjunsharma

PROFESSIONAL SUMMARY

Data Engineer with 2.5+ years of experience designing, developing, and maintaining scalable data pipelines and ETL workflows. Strong expertise in Python, SQL, Apache Spark, AWS, Airflow, and data warehousing. Experienced in transforming large datasets, automating data workflows, optimizing SQL queries, and building reliable data infrastructure for analytics and business intelligence.

TECHNICAL SKILLS

Programming	Python, SQL, Bash
Data Engineering	ETL/ELT, Data Pipelines, Data Warehousing, Data Modeling
Big Data	Apache Spark, PySpark
Cloud	AWS S3, AWS Glue, AWS Lambda, Amazon Redshift
Databases	PostgreSQL, MySQL, SQL Server
Workflow	Apache Airflow, Git, GitHub
Visualization	Power BI, Tableau
Other	REST APIs, Docker, Linux

PROFESSIONAL EXPERIENCE

Data Engineer — TechNova Solutions

Bengaluru, India | Jan 2024 – Present

- Developed and maintained scalable ETL pipelines using Python, PySpark, and Apache Airflow.
- Processed and transformed large datasets from APIs, databases, and CSV files for analytics applications.
- Built data pipelines using AWS S3, AWS Glue, and Amazon Redshift.
- Optimized SQL queries and data-processing workflows, reducing pipeline execution time by approximately 30%.
- Automated daily data ingestion and transformation jobs using Airflow DAGs.
- Implemented data-quality checks to identify missing, duplicate, and inconsistent records.
- Worked with analysts and business teams to understand data requirements and deliver reliable datasets.
- Used Git and GitHub for version control and collaborative development.

Junior Data Engineer — DataSphere Technologies

Bengaluru, India | Aug 2023 – Dec 2023

- Assisted in developing Python-based ETL pipelines for structured and semi-structured data.
- Created SQL queries for data extraction, transformation, and reporting.
- Worked with MySQL and PostgreSQL databases.
- Automated repetitive data-processing tasks using Python scripts.
- Assisted in migrating datasets to AWS S3.
- Created documentation for data pipelines, database tables, and transformation logic.
- Collaborated with senior engineers and data analysts to troubleshoot pipeline failures.

PROJECTS

E-Commerce Data Engineering Pipeline

Python | PySpark | Airflow | AWS S3 | Redshift

- Built an end-to-end data pipeline to process e-commerce orders, customers, and product data.
- Extracted data from APIs and CSV files and stored raw data in AWS S3.
- Used PySpark to clean and transform datasets and Airflow to automate the pipeline.
- Loaded processed data into Amazon Redshift for analytics.

Real-Time Stock Market Data Pipeline

Python | Kafka | Spark | PostgreSQL

- Developed a pipeline to ingest stock-market data in near real time.

- Used Kafka for streaming data ingestion and Spark for processing.
- Stored transformed data in PostgreSQL and implemented basic monitoring and error handling.

EDUCATION

Bachelor of Engineering — Computer Science & Engineering

Sri Siddhartha Institute of Technology, Karnataka | 2020 – 2024 | CGPA: 8.2/10

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Google Cloud Data Engineering Fundamentals
- SQL for Data Engineering — Coursera
- Python for Data Engineering — Udemy

ACHIEVEMENTS

- Reduced data pipeline processing time by approximately 30% through SQL and Spark optimization.
- Automated multiple manual data-processing workflows.
- Built production-style ETL projects using cloud and open-source technologies.
- Contributed to improving data quality and pipeline reliability.
